#### Psychology

#### Paper – III

- 1. The endocrine activity is regulated by
  - 1. Cerebellum
  - 2. Hypothalamus
  - 3. Thalamus
  - 4. Brain stem
  - (A) 1, 2, 3 and 4
  - (B) 1 only
  - (C) 3 only
  - (D) 2 and 4 only
- 2. Which of the following statements about pituitary hormones is not correct ?
  - (A) The hormone called somatotropin or growth hormone determines the growth and height of the individual
  - (B) The hormone called pituitary regulates blood pressure and controls activation of smooth muscles
  - (C) The trophic hormones exercise control over and regulates functions of other endrocrine glands
  - (D) The posterior hormones is called the master hormone as it controls the function of all other hormones

List – II

**3.** Match the following :

List – I

1. T	hala	mus		A.	Centre of reflex
2. H	lypot	halaı	nus	В.	action Vital centre of the brain
3. S	pinal	cord	b	C.	Indispensible to
	1edul Oblon			D.	Switch board
(A)	1C	2D	ЗA	4B	
(B)	2C	3D	4A	1B	
(C)	1A	2B	3C	4D	
(D)	1B	2C	3D	4A	

- **4.** The behaviour motivated by the need for varied, novel and complex sensations and experiences
  - (A) Subliminal perception
  - (B) Sensation seeking
  - (C) Sensory adaptation
  - (D) Sensory deprivation
- 5. The minimum intensity of the stimulus that evokes the response 50 percent of the time is termed as
  - 1. Differential threshold
  - 2. Terminal threshold
  - 3. Absolute threshold
  - 4. Point of subjective equality
  - (A) 1, 2 and 3
  - (B) 2, 3 and 4
  - (C) 3 only
  - (D) 4 only

3

- 6. Assertion A : An African tribe "zulu" are not susceptible to the Muller-Lyer illusion
  - **Reason R :** Zulus live in a world of open spaces and curves
  - (A) A is correct and B is wrong
  - (B) A is wrong and B is correct
  - (C) A and R are correct and R explains A
  - (D) A and R are correct but R is not a correct explanation for A

III⊠>

- Identify the correct order of the basic processes involved in observational learning
  - (A) Attention, Reproduction and Retention
  - (B) Retention, Attention and Reproduction
  - (C) Attention, Retention and Reproduction
  - (D) Reproduction, Retention and Attention

#### 8. Match List – I with List – II

Α.	Signal detection	1.	Pre existing
	theory		expectations
_		~	

- B. Subliminal2. Culture andperceptionperception
- C. Perceptual set 3. Below absolute threshold
- D. Carpented world 4. No absolute threshold exists

	Α	В	С	D
(A)	1	2	3	4
(B)	4	3	1	2
(C)	2	4	1	3
(D)	3	1	2	4

- 9. Child uses abusive language, father decides, on the days when the son use abusive language, he will not be given sweets. Which one of the following procedures is used by the father ?
  - (A) systematic desensitization
  - (B) punishment
  - (C) negative reinforcement
  - (D) positive reinforcement

- **10.** Learning occurs when a person observes some one's else behaviour is also called as
  - 1. imitation
  - 2. modeling
  - 3. insight
  - 4. conditioning
  - (A) 1 only
  - (B) 1 and 2
  - (C) 2 and 3
  - (D) 3 and 4
- **11. Assertion A :** Students often claim that reduced learning efficiency is due to the delay in returning the test papers by teachers.
  - Reason R : If there is a long period of time between response and reinforcement, learning efficiency will diminish considerably.
  - (A) A is correct and R is wrong
  - (B) A is wrong and R is correct
  - (C) A and R are correct and R is the correct explanation for A
  - (D) A and R are correct and R is not a correct explanation for A
- **12.** Arrange the following types of memory according to time frames
  - (A) working memory, sensory memory and long term memory
  - (B) long term memory, sensory memory and working memory
  - (C) sensory memory, working memory and long term memory
  - (D) working memory, episodic memory and sensory memory

13.	Match List – I with List – II									
	Α.	Hull		1.	Time interval					
	В.	Tolman		2.	Reciprocal					
					determinism					
	C.	Skinner		3.	Reaction					
					potential					
	D.	Bandura	a	4.	Sign-Gestalt					
		Α	В	С	D					
	(A)	1	2	4	3					
	(B)	2	1	3	4					
	(C)	4	3	2	1					
	(D)	3	4	1	2					

- 14. The phenomenon which refers to the improvement of recall when physiological or emotional conditions are the same as they were at the time of learning.
  - (A) Flash bulb memory
  - (B) State Dependent memory
  - (C) Working memory
  - (D) Chunking
- **15.** Which of the following are not enhanced in STM ?
  - 1. Chunking
  - 2. Flash bulb experiences
  - 3. Eidetic imagery
  - (A) 1, 2 and 3
  - (B) 1 and 3
  - (C) 2 and 3
  - (D) 1 and 2

- **16. Assertion A :** Impairment at any point in the memory circuit produces deficits in memory.
  - Reason R : Memories are not stored in a specific location in the Brain
  - (A) A is correct and R is wrong
  - (B) A is wrong and R is correct
  - (C) Both A and R are correct and R is not an explanation for A
  - (D) Both A and R are correct and R explains A
- 17. Identify the sequence involved in language development
  - (A) Lexeme, Morphemes, Phoneme
  - (B) Morphemes, Lexeme, Phoneme
  - (C) Lexeme, Phoneme and Morphemes
  - (D) Phoneme, Morphemes, Lexeme

### 18. Match List - I with List - II

A. Atkinson and 1. Levels of Shiffrin processing B. Tulving 2. Types of long term memory C. Craik and 3. Network model Lockhart D. Shanks 4. Information processing model D Α В С (A) 4 2 3 1 (B) 1 2 4 3 (C) 3 4 2 1 1 (D) 2 3 4 A-20-03 5

III⊠

1 Knowledge of

(A) structure (B) syntax A. Convergent (C) phonemes (D) process th 20. Thinking is more effective in problem solving, if it includes 1. Sequential reasoning 2. Means-ends readiness B. In 3. Mental trial and error 4. Dynamic organization (A) 1, 2, 3 and 4 (B) 2 and 4 only C. M (C) 4 only (D) 1 and 3 only 21. Assertion A: A problem exists when one has not defined a goal and donot seek a way to achieve that goal. **Reason R:** Aimless thinking, such as D. Pr day dreaming or fantasizing is called autistic thinking. (A) A and R are correct and R explains A (B) A is correct R is wrong (C) A is wrong R is correct (D) A and R are correct and R is not an explanation for A **22.** Identify the correct sequence of the three major phases which occur in general adaptation syndrome (A) Stage of exhaustion, alarm reaction and stage of resistance (B) Alarm reaction, stage of resistance and state of exhaustion (C) Stage of resistance, state of exhaustion and alarm reaction (D) Alarm reaction, stage of exhaustion and stage of resistance 6

**19.** The basic component of language is

23. Match List - I with List - II

АВ	С	D
		level
		subconscious
		worked on
ragmatics	4.	Problem bearing
		the past
		have worked in

	Α	В	C	U
(A)	1	2	4	3
(B)	2	4	3	1
(C)	3	1	2	4
(D)	4	3	1	2

- 24. The Theory which says that an individual is constantly in a state of activity, rather than a state of equilibrium or rest
  - (A) Expectancy value theory
  - (B) Horner's theory
  - (C) Raynor Entin approach
  - (D) Dynamics-of-action theory

- **25.** Facial expression of certain primary emotions include
  - 1. Innate
  - 2. Learned
  - 3. Derived from experiences
  - (A) 1, 2 and 3
  - (B) 1 only
  - (C) 2 and 3 only
  - (D) 1 and 3 only
- 26. Assertion A : Individuals are motivated to discover the underlying causes of behaviour.
  - **Reason R :** Effort is under a person's control and he is aminable to change.
  - (A) Both A and R are correct
  - (B) Both A and R are correct and R is an explanation for A
  - (C) Both A and R are not correct
  - (D) Both A and R are correct but R is not a correct explanation for A
- 27. Identify the appropriate sequence according to Guilford model of human intellect
  - (A) Products, contents, operations
  - (B) Operations, contents, products
  - (C) Contents, products, operations
  - (D) Contents, operations, products

- 28. Match the terms with their definition
  - 1. General adaptation syndrome
  - 2. Social Readjustment Rating Scale
  - 3. Adrenocorticotrophic harmone (ACTH)
  - 4. Taylor's manifest anxiety Scale
  - A. Measures the impact of readjustment to 43 major life events
  - B. Substance released by hypothalamus that stimulates pituitary gland
  - C. Series of bodily reactions common to all stress
  - D. A test used to select subjects high and low in anxiety
  - 1 4 2 3 С (A) A В D (B) B С А D (C) C Α В D (D) D А С В
- 29. Jensen study involves comparison of
  - (A) Siblings and Fraternal twins
  - (B) Identical and Fraternal twins
  - (C) Peer groups

(C) 2 only

- (D) Blacks and whites
- **30.** The components of emotional intelligence include
  - 1. Perception, affection and expression of emotions
  - 2. recognition, expression and control of emotions
  - 3. Temperament, recognition and expression of emotion
  - 4. Intelligence, recognition and control of emotions
  - (A) 1, 2, 3 and 4 (B) 4 only
    - (D) 1 and 3 only

7

- **31. Assertion A :** People are more creative than they give themselves credit for
  - **Reason R :** Most education focuses on developing convergent thinking.
  - (A) A is correct R is wrong
  - (B) A is wrong R is correct
  - (C) A and R are correct but R is not a correct explanation for A
  - (D) A and R are correct and R is correct explanation for A
- **32.** Identify the correct sequence of administering and scoring Rorschach Ink blot test
  - (A) Inquiry, suggesting, Naming and interpretation
  - (B) Naming, inquiry, suggesting, interpretation
  - (C) Interpretation, inquiry, suggesting, naming
  - (D) Suggesting, inquiry, naming, interpretation
- **33.** Match the terms with their definitions
  - 1. Anoxia
  - 2. Performance components
  - 3. Conventiality
  - 4. Novelty
  - A. Related to convergent thinking that gives single right answer
  - B. Extreme lack of oxygen at birth that can cause mental retardation
  - C. Refers to divergent thinking that can give more than one response
  - D. Actual mental processes used to execute a task

	1	2	3	4
(A)	А	В	С	D

- (B) B D A C
- (C) C D B A
- (D) D A C B

- **34.** Which one of the following is not true of a person with type A personality ?
  - (A) Sleeplessness
  - (B) Time urgency
  - (C) Meticulous analysis of problem
  - (D) Compulsion for time keeping
- **35.** Personality tests are not helpful in answering questions such as
  - 1. How does personality change with age ?
  - 2. Do identical twins differ in personality ?
  - 3. How can one personality type can be changed into another ?
  - 4. How are personality traits related to socio economic status ?
  - (A) 2 only (B) 3 only
  - (C) 1 and 2 only (D) 1, 2, 3 and 4
- **36. Assertion A :** Subjective experience is considered as important as objective reports by Humanistic theories of personality
  - Reason R : Personality maladjustment occurs when a difference develops between a person's self-image and the reality of a situation
  - (A) Both A and R are correct and R is not an explanation for A
  - (B) Both A and R are correct and R is a correct explanation for A
  - (C) A is correct and R is wrong
  - (D) A is wrong and R is correct

III⊠>

- 37. Identify the stages in Alcohol dependence
  - (A) Social drinking, habitual drinking, Bingeing and addiction
  - (B) Habitual drinking, social drinking, addiction and Bingeing
  - (C) Bingeing, social drinking, addiction and habitual drinking
  - (D) Social drinking, Bingeing, habitual drinking and addiction
- 38. Match the following :
  - 1. Rogers A. MBTI
  - 2. Bandura B. TAT
  - 3. Myers-Briggs C. Positive regard
  - 4. Murray D. Modelling

	1	2	3	4
(A)	А	В	С	D
(B)	В	С	D	А
(C)	С	D	А	В
(D)	D	А	В	С

- **39.** Which is not of the best way for knowing discrimination index ?
  - (A) Item-total correlation
  - (B) ANOVA
  - (C) t-ratio
  - (D) Coefficient of concordance
- **40.** The multiple regression equation is mainly used for
  - 1. analysis
  - 2. prediction
  - 3. factor loading
  - (A) 1, 2 and 3 (B) 1 and 2
  - (C) 1 and 3 (D) 2 and 3

- **41. Assertion A :** Human behaviour is an outcome of an interaction of several factors
  - Reason R: Factor analysis is a technique to establish relationships between groups of variables
  - (A) A is correct and R is wrong
  - (B) A is wrong and R is correct
  - (C) A and R are correct and R is not an explanation for R
  - (D) A and R are correct and R is an explanation for A
- **42.** Match the following keeping in view the context
  - Proximity error
     Movement error
     Multiple choice items
  - 3. Error of anticipation C. Rating scale
  - 4. Order effect D. Method of limits

	1	2	3	4
(A)	В	С	D	А
(B)	С	А	D	В
(C)	А	В	С	D
(D)	D	А	С	В

- **43.** In which of the following do you find errors of habituation and anticipation ?
  - (A) Method of average error
  - (B) Method of minimal changes
  - (C) Method of constant stimuli
  - (D) Method of pair comparison

9

- 44. Discriminant validity is called
  - 1. When test correlated from expected referants
  - 2. When a test is able to differentiate in different expected criteria
  - 3. When a test is not correlated with their expected referents
  - (A) 1 only (B) 2 only
  - (C) 3 only (D) 1, 2 and 3
- **45. Assertion A :** Alcoholics have a physiological and psychological dependence on alcohol
  - Reason R : Alcohol abuse is a learned behaviour and can be unlearned
  - (A) A and R are correct
  - (B) A and R are wrong
  - (C) A and R are correct and R is an explanation for A
  - (D) A and R are correct but R is not an explanation for A
- 46. Match the terms with their difinition
  - 1. Case study
  - 2. Unstructured interview
  - 3. Quasi experimental design
  - 4. Controled variable
  - A. Extraneous variable
  - B. A research to establish cause of some event
  - C. A descriptive research that derives inferences, conclusions and generalizations
  - D. Facilitates insight into a particular situation in the early stage of investigation
  - 1
     2
     3
     4

     (A)

     B
     C
     D

     (B)
     B
     C
     D
     A
  - (C) C D B A
  - (D) D A C B

Question **47 – 50** are based on the paragraph. Read the paragraph.

Both genetics and learning are involved in the acquisition and modification of behaviour. Neither alone can account for the relatively simple learning that takes place in the animal laboratory or the vast reportoire of behaviours that humans acquire over a life time. Learning is clearly both an important process and a complex one. It is most basically a set of mechanisms that have evolved over the course of genetic history to allow us to adopt to environmental conditions by acquiring new behaviours and modifying old ones.

- **47.** In which of the following genetics and learning are involved ?
  - 1. Animal laboratory
  - 2. Acquisition of behaviour
  - 3. Modification of behaviour
  - 4. Environment
  - (A) 1, 2, 3 and 4
  - (B) 1 and 3
  - (C) 2 and 4
  - (D) 2 and 3
- **48.** The mechanisms evolved over the course of genetic history has allowed us
  - 1. To adopt environmental conditions
  - 2. To acquire new behaviours
  - 3. To modify old behaviours
  - 4. To change our life styles
  - (A) 1, 2, 3 and 4
  - (B) 1, 2 and 3
  - (C) 2 and 4 only
  - (D) 1 and 2 only

- **49.** Which is considered as most important in human learning ?
  - 1. Curiosity
  - 2. Reinforcement
  - 3. Knowledge of results
  - 4. Level of aspiration
  - (A) 1, 2 and 3
  - (B) 1, 3 and 4
  - (C) 2, 3 and 4
  - (D) 1, 2 and 4
- **50.** The fundamental property of learning is that it
  - (A) Modifies some stimulus-response relations
  - (B) Promotes physical maturation
  - (C) Requires perceptual skills
  - (D) Modifies human behaviour
- **51.** A social psychologist would attempt to explain an individuals behaviour in terms of \_\_\_\_\_
  - (A) individual differences in personality
  - (B) the influence of past events
  - (C) the influence of other people
  - (D) the interaction of heredity and environment

### **52.** Match the following :

1

(A) C

(B) B

(C) A

(D) D

2

D

С

В

С

- 1. Sociogram A. Likert
- 2. Social distance B. Festinger
- 3. Cognitive dissonance C. Moreno

3

В

С

Α

4. Semantic differential D. Bogardus

4

Α

А

D

В

- **53. Assertion (A) :** Children's gender development occurs through observation and imitation of gender related behaviour
  - Reason (R): Through rewards and punishments, children experience and learn gender appropriate and gender inappropriate behaviour
  - (A) A and R are false
  - (B) A and R are true but R is not the correct explanation
  - (C) A is true but R is false
  - (D) A and R are true and R is the correct explanation for A
- **54.** Identify the correct order of sequence in the manifestation of attitudes
  - 1. Emotional
  - 2. Behavioural
  - 3. Cognitive

### Codes :

- (A) 3, 2, 1
- (B) 1, 2, 3
- (C) 3, 1, 2
- (D) 1, 3, 2

11

- **55.** The stage proposed by Piaget in which conceptualization and prelogical reasoning develops
  - (A) Sensori-motor stage
  - (B) Pre-operational stage
  - (C) Concrete operational stage
  - (D) Formal operational stage

III⊠

- **56.** Which of the following make a communicator more persuasive ?
  - 1. Credibility
  - 2. Physical Attractiveness
  - 3. Lack of vested interest
  - 4. Similarity to the target audience

### Codes :

- (A) 1, 2 and 3
- (B) 2, 3 and 4
- (C) 1, 2 and 4
- (D) 1, 3 and 4
- 57. The stages of moral development are
  - 1. Pre moral stage
  - 2. Conventional conformity
  - 3. Self accepted values
  - (A) 1, 2 and 3
  - (B) 1 and 2
  - (C) 2 and 3
  - (D) 1 and 3

### 58. Match List I with List II

Α.	A. Critical period					Typical behaviour for children of various ages
В.	3. Maturation					Ability to learn a behaviour
C. Readiness					3.	The period where the child can learn a behaviour or not learn later
	D. Developmental scales			ntal	4.	Gradual unholding of inherent traits
		Α	В	С	D	
(A	)	3	4	2	1	
(B	5)	2	3	1	4	
(C	;)	4	2	3	1	
(D	)	1	2	4	3	

- 59. Assertion A : Children adopt values that may differ significantly from those held by the parents
  - Reason R : The continued influence and interaction with age mates assumes greater importance in determining the older child's values
  - (A) A is correct and R is wrong
  - (B) A is incorrect and R is correct
  - (C) A and R are incorrect
  - (D) A and R are correct and R is an explanation for A
- **60.** Identify the correct sequence of cut-off points for post natal development
  - (A) Adulthood, Childhood, Adolescence and Infancy
  - (B) Infancy, Adolescence, Adulthood and Childhood
  - (C) Infancy, Childhood, Adolescence and Adulthood
  - (D) Childhood, Adulthood, Adolescence and Infancy
- 61. Motivation could be described as
  - (A) An instinctual response to a need
  - (B) A modifier of behaviour
  - (C) An acquired response to a need
  - (D) An energizer of behaviour

**Q. No. 73** to **75** are based on the following passage :

Development is a pattern of movement or change that occurs throughout the life span. Development involves the interplay of biological, cognitive and socio emotional processes. Development is influenced by the interaction of maturation and experience. The debate over the role of maturation and experience is another version of the nature-nurture controversy. Development may be described as either continuous (gradual, cumulative change) or discontinuous (an abrupt sequence of stage). Whether the development is determined more by earlier experiences or later experiences is a hotly debated issue.

- **73.** The inability to distinguish between one's perspective and someone else's perspective is
  - (A) Conservation
  - (B) Egocentrism
  - (C) Concrete operational thought
  - (D) Assimilation
- 74. Development is always described as
  - 1. Gradual
  - 2. Cumulative
  - 3. Abrupt
  - 4. Accidental
  - (A) 1, 2, 3 and 4
  - (B) 1 and 2 only
  - (C) 3 and 4 only
  - (D) 2 and 4 only
- **75.** The most hotly debated issue with regard to development is
  - 1. It is determined more by earlier experiences
  - 2. It is determined more by later experiences
  - 3. It is determined more by physical growth
  - 4. It is determined more by Muscular strength
  - (A) 1, 3 and 4
  - (B) 1, 2 and 3
  - (C) 1 and 2
  - (D) 3 and 4
